

# SUSTAINABILITY HIGHLIGHTS 2022

Our ambition:  
to be a  
climate-neutral  
brewery!

## TopClip cans

Plastic saved by using  
TopClip packaging for  
our cans.

## Introduction volunteer programme

Each employee is allowed to volunteer  
16 hours per year during working hours.

112 employees

15 projects

TIME  
FOR EACH  
OTHER

## Sustainable heat

With the commissioning of Twence's heat  
pipeline, we consume less natural gas.  
By doing so, we will save:

5,500 tonnes of CO<sub>2</sub> per year, equivalent  
to the emissions of 1,800 households

-72%  
CO<sub>2</sub>  
emissions

## Green gas

A green gas plant converts biogas  
into green gas which is then supplied to the  
natural gas grid. Annually, we produce:

GROENE

1 mln.  
Nm<sup>3</sup>  
of green gas

ENERGIE

This is equivalent to the gas consumption  
of 700 households per year.

## Sustainable festivals

Switched to reusable carrier  
trays made of recycled plastic  
and recyclable PET cups.

## Lean & Green

Awarding of second  
Lean & Green star.

## Water availability

Comprehensive water risk  
survey conducted on water  
availability for the brewery.

## Water cooperation in the region

Together with the Dutch Water Board  
and Vitens, under the name 'Ons blauwe  
goud', we are working together on sufficient  
water in Twente for everyone.

## Responsible alcohol consumption

Financial contribution to support  
the KiKiD Booze project.

KiKiD  
BOOZE
