

SUSTAINABILITY HIGHLIGHTS 2022

Our ambition:
to be a
climate-neutral
brewery!

TopClip cans

Plastic saved by using
TopClip packaging for
our cans.

Introduction volunteer programme

Each employee is allowed to volunteer
16 hours per year during working hours.

Sustainable heat

With the commissioning of Twence's heat
pipeline, we consume less natural gas.
By doing so, we will save:

**5,500 tonnes of CO₂ per year, equivalent
to the emissions of 1,800 households**

emissions

Green gas

A green gas plant converts biogas
into green gas which is then supplied to the
natural gas grid. Annually, we produce:

GROENE

1 mln.
Nm³
of green gas

ENERGIE

**This is equivalent to the gas consumption
of 700 households per year.**

Sustainable festivals

Switched to reusable carrier
trays made of recycled plastic
and recyclable PET cups.

Lean & Green

Awarding of second
Lean & Green star.

Water availability

Comprehensive water risk
survey conducted on water
availability for the brewery.

Water cooperation in the region

Together with the Dutch Water Board
and Vitens, under the name 'Ons blauwe
goud', we are working together on sufficient
water in Twente for everyone.

Responsible alcohol consumption

Financial contribution to support
the KiKiD Booze project.
